

# How to buy Decenomy coins on Heliobank

In this guide we will explain how to buy Decenomy coins on Heliobank. First of all we go to this link <https://dex.heliobank.net> then we register. We recommend that you do not lose your password, otherwise you will no longer be able to access your account. (save the password in a safe place).

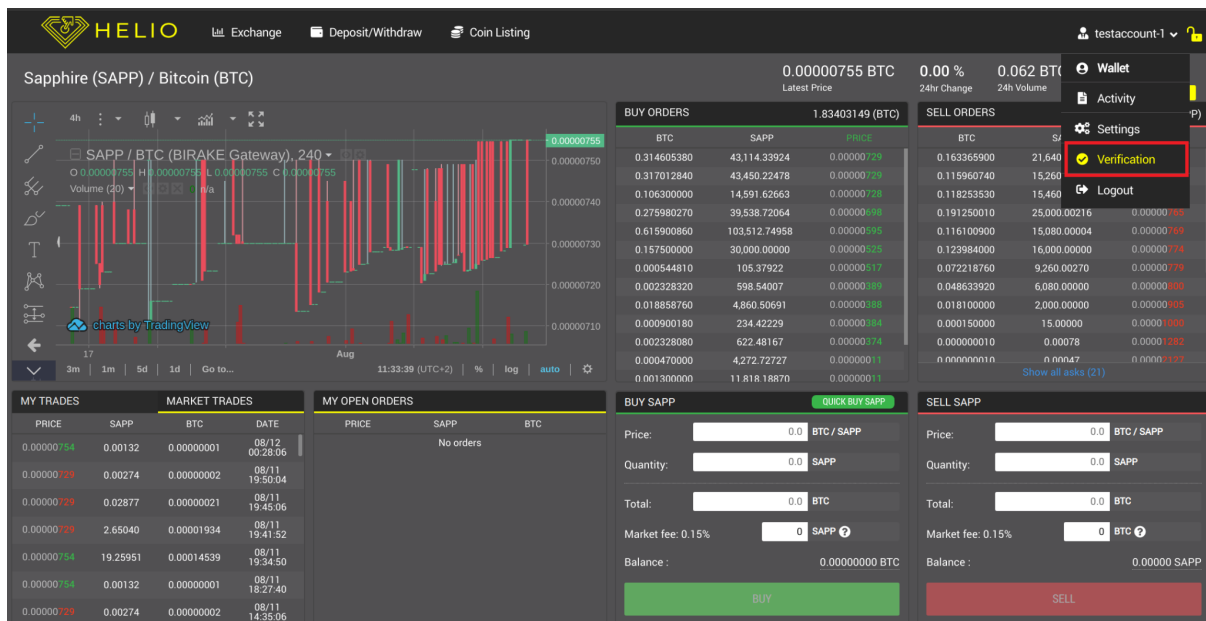

The screenshot shows the Heliobank registration interface. At the top, the Helio logo is on the left, and navigation links for 'Exchange', 'Create account / Login' (highlighted with a red box), and 'Coin Listing' are on the right. The main registration form is centered and contains the following elements:

- A language selector showing the UK flag.
- Two yellow buttons: 'CREATE ACCOUNT' and 'LOGIN'.
- An 'ACCOUNT NAME (PUBLIC)' input field with the text 'testaccount-1'.
- An 'EMAIL' input field with the text 'testaccount@gmail.com'.
- A 'GENERATED PASSWORD' section, highlighted with a red box, showing a long alphanumeric string: 'P5Jn9oTGLgcdEhPgCYmRxD7mZYFXocwFBQe49QyDhfMEj'. A copy icon is visible to the right of the password.
- A 'CONFIRM PASSWORD' input field with masked characters.
- Three terms and conditions checkboxes, all of which are checked:
  - ☒ I understand that I will lose access to my funds if I lose my password
  - ☒ I understand that no one can recover my password if I lose or forget it
  - ☒ I have written down or otherwise stored my password
- A final yellow 'CREATE ACCOUNT' button.

At the bottom of the page, a footer contains links for 'Fees', 'Support', 'Terms And Conditions', 'Delisting Policy', 'Privacy Policy', 'AML Policy', 'Risk Statement', and 'Apl'.

After registration it will be necessary to verify our account with an identity document in order to make deposits and withdrawals (usually accounts are verified in 48 hours). In the menu at the top right we choose the link verification.

In the next screen you will be able to upload the required documents.

The screenshot shows the Helio Exchange 'Verification' page. The 'Verification' tab is selected in the left sidebar. The 'KYC Verification' section is visible, providing instructions on how to get the account verified by preparing identity documents.

**KYC Verification**

To get your account verified please prepare your identity documents

**Identity Proof - any of the following:**

1. Passport
2. National ID
3. Driving License
4. Letter from a recognized public authority
5. Employee ID card of a listed company
6. Voters ID card

**Address Proof - any of the following:**

1. Passport
2. Voters ID card
3. Electricity Bill, Telephone bill including mobile, landline, wireless, etc type of connections, not more than 6 months old
4. Bank Account Statement
5. Credit Card Statement
6. Lease agreement along with last 3 months rent receipt

Please make sure that your document is valid. To get the detailed information on how to pass KYC Please read the complete guide.

When our account is verified we will be able to make a deposit, in this case in Bitcoin.  
So now we click on Deposit / Withdraw

Once this is done we will find ourselves on the deposits page  
Now let's choose.

- BTC from the drop-down menu
- Choose Deposit
- Copy the address

The screenshot shows the 'Deposit & Withdraw' page on the HELIO Exchange. On the left, a dropdown menu lists various cryptocurrencies, with 'BTC' highlighted (labeled 1). On the right, the 'DEPOSIT' button is highlighted with a red box (labeled 2). Below the buttons, the Bitcoin address '18oVCAvioxvK8KudF2pRaixAGeAEZ7K6vP' is displayed in a red box (labeled 3), with a yellow 'COPY ADDRESS' button below it. The page also includes a 'Deposit instructions' section and a 'No recent transactions' message at the bottom.

We can now send our Bitcoins to the newly copied deposit address.  
After about a few minutes we will have our Bitcoins on Heliobank, as we can see from our Current balance.

Coin Listing

## Deposit & Withdraw

PLEASE SELECT THE COIN YOU WOULD LIKE TO DEPOSIT:

BTC

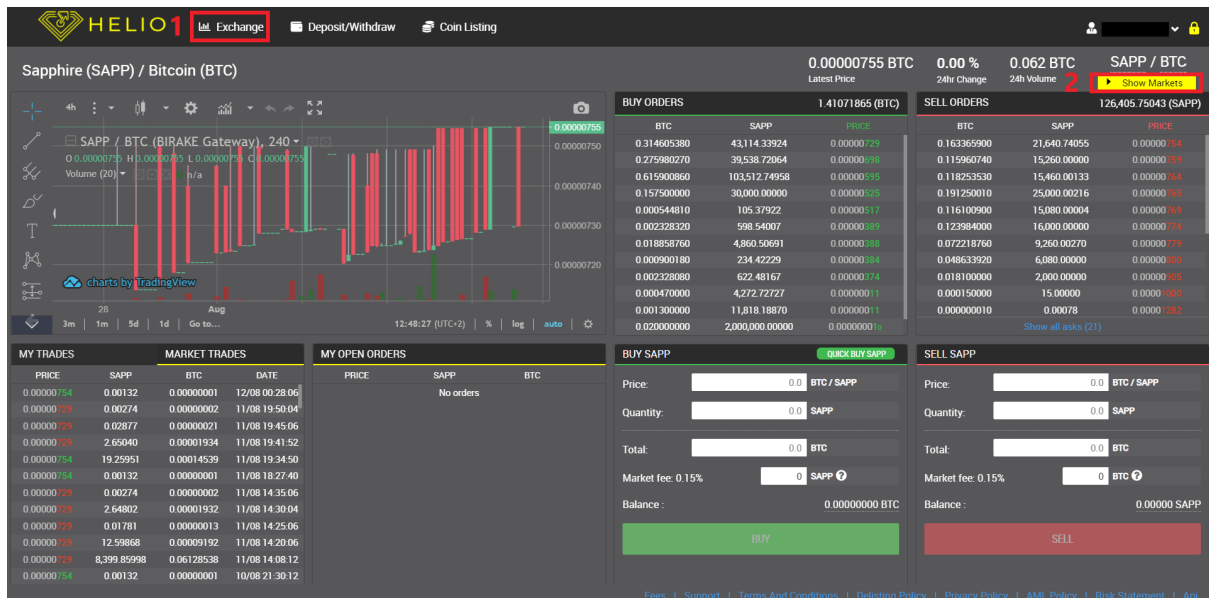

### Deposit summary

Asset to deposit:	BTC
You will receive:	BTC
Your account	
<b>Current balance:</b>	<b>0.00250000 BTC</b>
Withdrawal fee :	0.001 BTC
Minimum Deposit:	0.001 BTC

Any amount deposited lower than Minimum Deposit will be lost

Now we have to go on

- Exchange
- Show Markets

Once this is done, a search bar will open where we can choose the coins.  
In this case we have chosen to buy Tritium (TRTT).

MARKET DEPTH

Now click on the TRTT market name to enter it.  
A page will open with the buy and sell orders (in this case Trittium)

Now we can proceed with the purchase.

We have 0.00250000 BTC available.

So we can buy Trittium for this value in the SELL orders table.
