

How to add addnodes

In case we have problems connecting our wallet to the blockchain we need addnodes (peers).

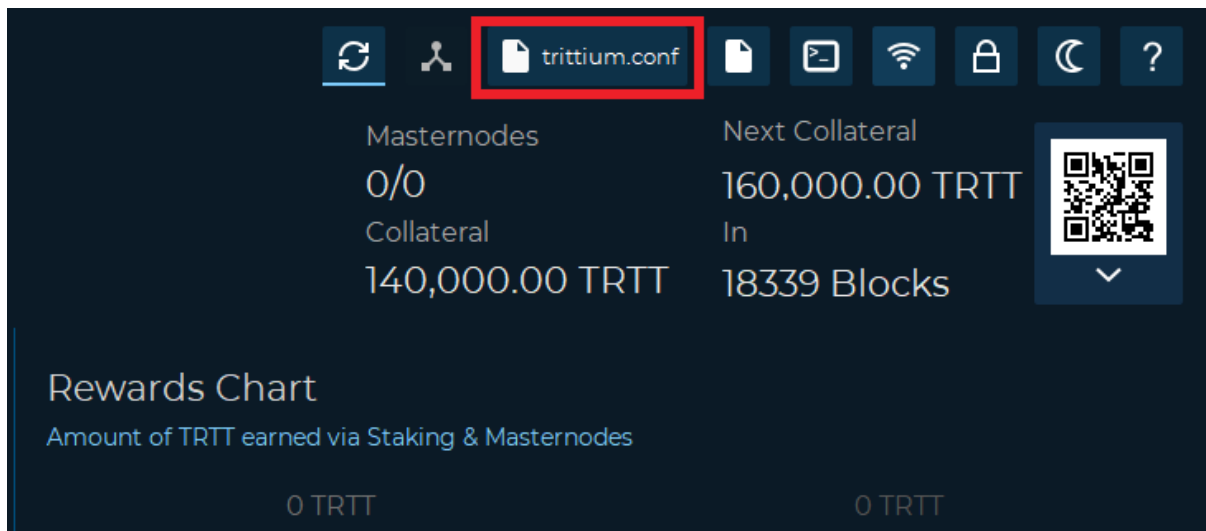

Here we explain in a few simple steps how to do it.

First of all, let's open our wallet (in our case Trittium)

Now we go to the top right and we will see the configuration file icon (in our case tritium.conf).

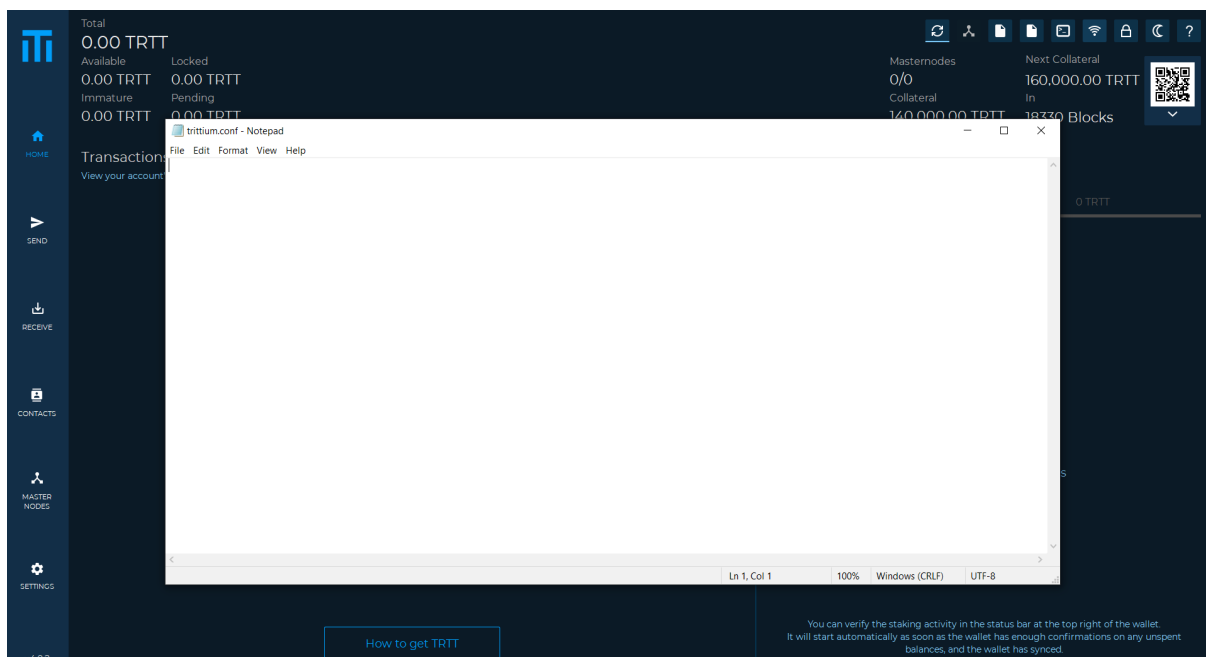

As in the following picture

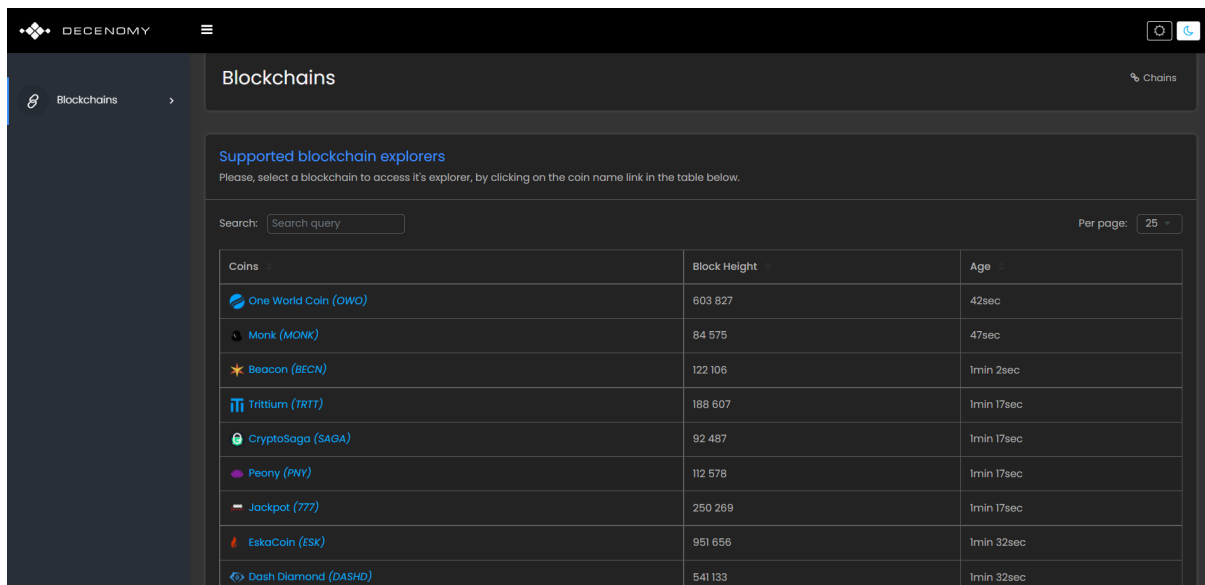

Now click on the configuration file icon to open it.

In case Windows asks us which program we want to use to open it, it is advisable to choose Notepad.

As in the following image

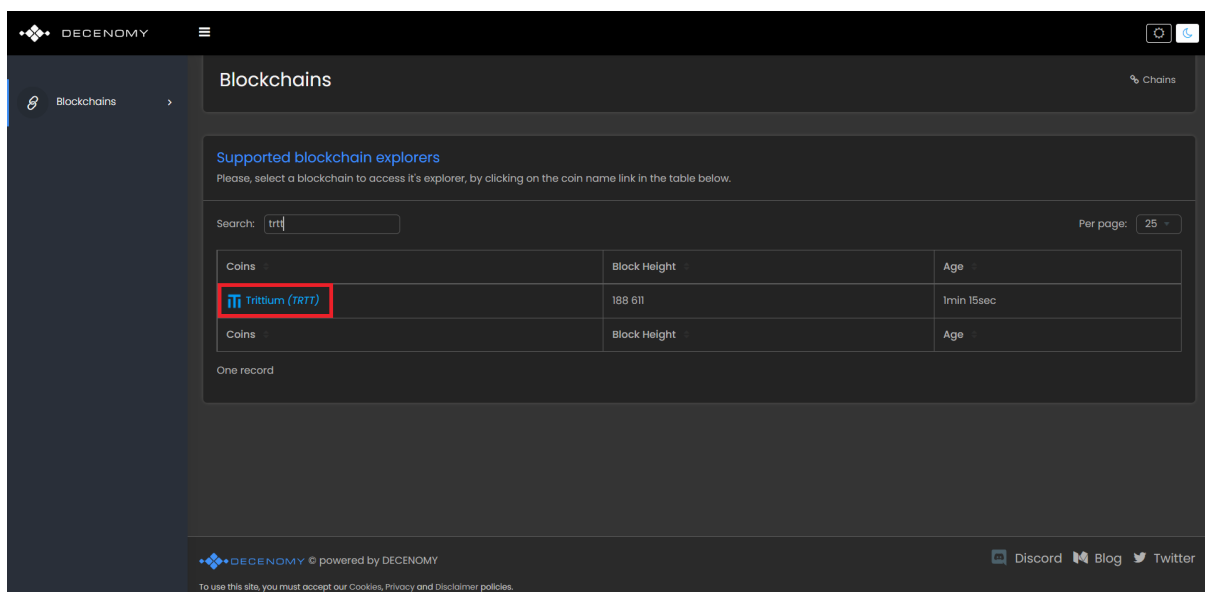

Once this is done, we go to our browser and go to the DECENOMY block explorer at this link: <https://explorer.decenomy.net/>

The screenshot shows the DECENOMY website's 'Blockchains' section. It features a search bar and a table of supported blockchain explorers. The table has three columns: 'Coins', 'Block Height', and 'Age'. The coins listed are One World Coin (OWO), Monk (MONK), Beacon (BECN), Trittium (TRTT), CryptoSaga (SAGA), Peony (PNY), Jackpot (777), ESKaCoin (ESK), and Dash Diamond (DASHD).

Coins	Block Height	Age
One World Coin (OWO)	603 827	42sec
Monk (MONK)	84 575	47sec
Beacon (BECN)	122 106	1min 2sec
Trittium (TRTT)	188 607	1min 17sec
CryptoSaga (SAGA)	92 487	1min 17sec
Peony (PNY)	112 578	1min 17sec
Jackpot (777)	250 269	1min 17sec
ESKaCoin (ESK)	951 656	1min 32sec
Dash Diamond (DASHD)	541 133	1min 32sec

Now we type in the search bar the coin we are looking for (in this case Trittium). Then we click on the name of the chosen coin.

The screenshot shows the DECENOMY website's 'Blockchains' section with the search bar containing 'trtt'. The table of supported blockchain explorers is filtered to show only Trittium (TRTT). The coin name 'Trittium (TRTT)' is highlighted with a red box.

Coins	Block Height	Age
Trittium (TRTT)	188 611	1min 15sec

One record

As we can see in the next screen, we can choose the Network label from the left menu.

The screenshot shows the Decenomy Trittium TRTT Explorer interface. The left sidebar menu has 'Network' highlighted with a red box. The main content area displays network statistics and a table of latest blocks.

Network Statistics:

- Active nodes: 1 509
- ROI (annual): 139.56%
- MN price (USD): 8876.30
- ROI reached: 258 days
- AVG payout: 1 day

Latest blocks table:

Block height	Hash	Transactions	Timestamp
188 614	44c39d79108ada6084ecaf1a79714f32cd5e6be9ddf15b7aebaf408711eb09dd	2	Sat, Jul 31, 2021, 4:01 PM
188 613	0c27a172092d13716f74366cc904bdaf26bb2065a2430cf0f87343eccc27974	2	Sat, Jul 31, 2021, 4:00 PM
188 612	cc2dd4f31806023dd404cb715965a11e1e67ee46cb76139de48f51638de4c6d8	2	Sat, Jul 31, 2021, 3:59 PM
188 611	156651e57e05e28cb63f62c74fa43157bcbeedd198b79e98e01f59480lea037	2	Sat, Jul 31, 2021, 3:57 PM
188 610	f267e261d6281ace7c4c009f931c0e76c5813de848f45791508cc92b3e7c45de	2	Sat, Jul 31, 2021, 3:57 PM

Now we choose the list of nodes that correspond to the version of the most updated wallet in this case 4.0.2

The version of our wallet can be seen at the bottom left of the main screen of our wallet.

The screenshot shows the Decenomy Trittium TRTT Explorer interface with the 'Network' section selected. The 'Connected network clients' table has 'Trittium:4.0.2/' highlighted with a red box. A donut chart on the right shows the distribution of wallet versions.

Connected network clients table:

Sub-version	Protocol	Count
Trittium:4.0.2/ (node list)	71009	234
Trittium:4.0.1/ (node list)	71009	11
Trittium:4.0.1.2/ (node list)	71009	1
Trittium:4.0.1.1/ (node list)	71009	1

4 records

Donut Chart Legend:

- Trittium:4.0.2/ (Purple)
- Trittium:4.0.1/ (Green)
- Trittium:4.0.1.2/ (Blue)
- Trittium:4.0.1.1/ (Yellow)

Now we click on 4.0.2, this window will open and we copy the addnodes.

The screenshot shows the Decenomy interface with a modal window titled "Node List for /Trittium:4.0.2/". The modal contains the following text:

Copy the lines below and add them to your [COIN].conf file, located in the wallet configuration folder.

```
addnode=[2a01:4f9:3a:27d4::10a]:31001
addnode=[2a02:c207:2053:1597::1a]:31001
addnode=[2001:41d0:700:4b38::224]:31001
addnode=[2a01:4f8:252:320c::4]:31001
addnode=[2607:5300:203:65aa::1e2]:31001
addnode=45.63.25.214:31001
```

Below the list is a "Close" button. In the background, the Decenomy interface shows a sidebar with "Network" selected, a main area with "Connected network clients" table, and a donut chart on the right.

Sub-version	Protocol	Count
/Trittium:4.0.2/	71009	234
/Trittium:4.0.1/	71009	11
/Trittium:4.0.12/	71009	1
/Trittium:4.0.11/	71009	1

4 records

Donut chart legend:

- /Trittium:4.0.2/ (Purple)
- /Trittium:4.0.12/ (Blue)
- /Trittium:4.0.1/ (Green)
- /Trittium:4.0.11/ (Yellow)

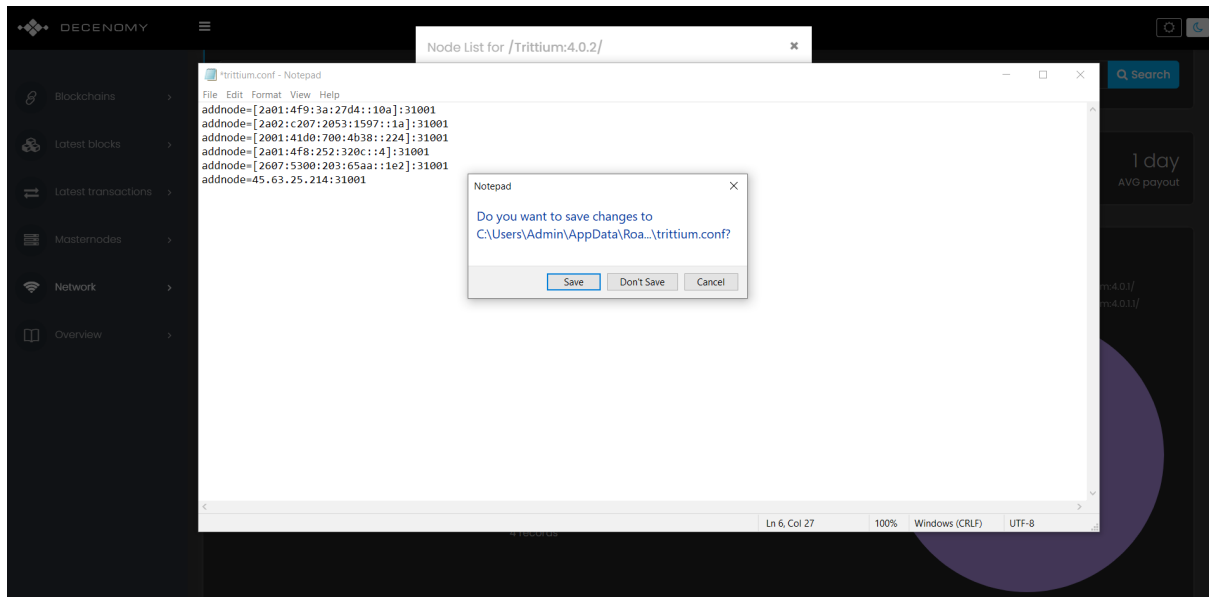

Now let's go back to the Notepad to paste the addnodes.

This screenshot shows the same Decenomy interface as the previous one, but with a Notepad window open in the foreground. The Notepad window is titled "*trittium.conf - Notepad" and contains the following text:

```
File Edit Format View Help
addnode=[2a01:4f9:3a:27d4::10a]:31001
addnode=[2a02:c207:2053:1597::1a]:31001
addnode=[2001:41d0:700:4b38::224]:31001
addnode=[2a01:4f8:252:320c::4]:31001
addnode=[2607:5300:203:65aa::1e2]:31001
addnode=45.63.25.214:31001
```

The modal window from the previous screenshot is still visible in the background, showing the list of addnodes to be copied.

Now we can close the Notepad and save the file.
As in the picture

Once this is done, we close and restart our wallet to apply the changes.
Now our wallet is ready to be used!
